REPORT ON PATENTABILITY
(SEPARATE SHEET)

Re Item V.

1.)

The following documents are referred to in this communication:

D1 : WO 97/16051 A

D2 : DE 197 52 548 A

2.)

The subject-matter of claim 1 is **novel** (Article 33(2) PCT).

Document D1, which is considered to represent the most relevant state of the art, discloses (the references in parenthesis applying to this document): an electric heating unit arranged in one or more closed cavities (2) in a block (1) for use in a continuous casting installation.

From this, the subject-matter of independent claim 1 **differs** in that :

said heating unit including a heating chamber for liquid metal having an inlet and an outlet, the heating chamber being constructed and arranged for a continuous flow of liquid metal through the chamber from the inlet to the outlet, and at least one thermostatically controllable electrical resistance heating element mounted within the heating chamber below the level of the outlet, said heating element being constructed and arranged to heat liquid metal flowing through the chamber to a predetermined liquid metal temperature.

2.1)

The **problem to be solved** by the present invention may be regarded as:
Varying melt temperature and consequently nonuniform grainstructure.

2.2)

The solution to this problem (**effect** of the invention) proposed in claim 1 of the present application is considered as involving an inventive step (Article 33(3) PCT) for the following reasons:

By providing a heating unit with the features of claim 1 a uniform temperature of the melt is given and the quality of the cast product is better.

2.3)

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

International application No.

PCT/GB2004/001164

Claims 2-16 are dependent on claim 1 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

3.)

The subject-matter of claim 17 is novel and inventive, because the heating unit (see claim 1) is part of the casting installation and not known from the prior art as described above.

3.1)

Claims 18-24 are dependent on claim 17 and as such also meet the requirements of the PCT with respect to novelty and inventive step.

4.)

The subject-matter of claim 25 is therefore novel and inventive too, because a method is claimed, where the heating unit of claim 1 is used.

4.1)

Claims 26-36 are dependent on claim 25 and as such also meet the requirements of the PCT with respect to novelty and inventive step.
